## What Separates Nspire Network From the Rest?

Because our product provides a **true need**, you can earn long term residual income for years to come. We are “**Customer Driven**” which means unlike traditional Network Marketing, your success is not based on recruiting or building a large organization.

- Most of the iconic companies in the Direct Sales industry have become billion dollar companies by capturing 1% to 3% of the market share in their particular industry. Because of our extremely important mission driven awareness campaign, our experience leadership team, and the necessity of this product for women, Nspire Network is perfectly positioned to capture a larger percentage of market shares in the sanitary napkin industry!
- This is a mission driven movement that millions of people can be a part of either by becoming a customer, a distributor or both!
- This product could be one of the most important medical breakthroughs for women today, and has the potential to positively affect over 60% of women in the U.S., thereby creating true, long-term residual income!

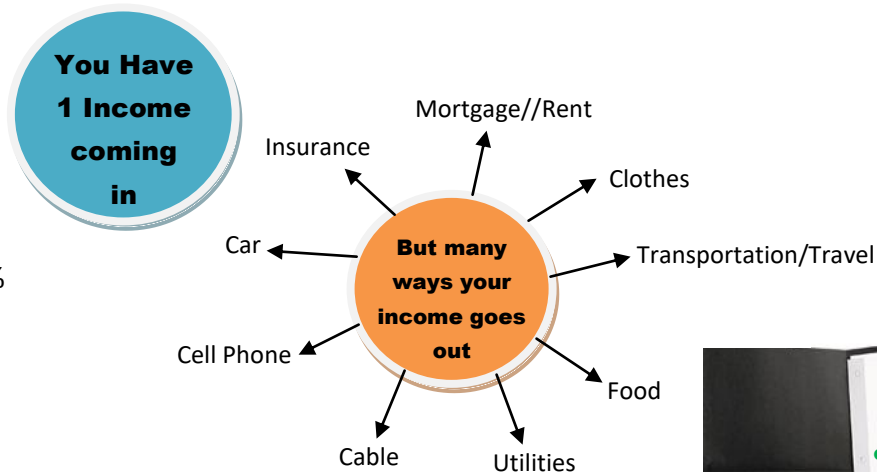

## How Does This Benefit You?

Whether you are looking to supplement your income, replace your income, or earn an executive income, our goal is to help you reach your goal within 1-3 years.
